Abstract guidelines:

All articles published by *Research and Advances in Psychiatry* are made freely and permanently accessible online immediately upon publication, without subscription charges or registration barriers. Authors of articles published in *Research and Advances in Psychiatry* are the copyright

holders of their articles and have granted to any third party, in advance and in perpetuity, the right to use, reproduce or disseminate the article.

Non-Native Speakers of English

Authors for whom English is a second language should have their manuscript reviewed for clarity by a colleague whose native language is English or edited by a fluent English speaker before submission.

Title

Full title should be 12 words or fewer. It should be specific, descriptive, concise, and comprehensible to readers outside the subject field. Avoid abbreviations if possible.

Authors

List the authors in the order in which they have to appear in the by-line of the published article. Provide institutional affiliation for each author; one author should be designated as the corresponding author, and his or her email address or other contact information should be included.

Word Count

The abstracts should not exceed 250 words. This does not include the title and authors.

Abstract structure

The abstract should describe the main objective(s) of the study, explain how the study was done, summarize the most important results and their significance.
